

# Creating CDC's

Ad-ID codes are created at [www.ad-id.org](http://www.ad-id.org). Complimentary Definition Codes (CDC's) are matching SD, HD and/or 3D codes where only the 12<sup>th</sup> character of the code varies. This only applies to Video codes. When creating a code, you can select to create the matching SD/HD/3D at the time of code creation. This document will provide instructions on creating a CDC of an existing code.

You will need to find the existing code for which you want to create the CDC. Codes can be found on your dashboard, in a group or after doing a search.

1. The dashboard provides a list of your most recently created Ad-ID codes. This table shows up to 100 codes.

To access a group, go to the Groups list and click on a Group name. The Ad-ID code table on the group home page shows up to 1,000 codes.

To do a search, use one of the available search features. The Ad-ID Code table in the search results shows up to 35,000 codes.

- On the Dashboard and group home page, the table allows you to sort by the columns and also filter within the table. The filter works as a quick search, for instance, type in one of the titles and it will filter the table. You can also choose to see more or less records per page.

- Export as CSV
- Export as Excel

- To create the CDC (matching SD/HD/3D), you can do so in the edit screen. In this example, we are editing the SD code and have checked off HD to create the matching HD code.

Select a group to add this new CDC to. Only groups that contain the prefix creating this code are shown, and only groups you have permission to create codes in.

Each definition checked (excluding the first one) will create a complimentary code to the original. You are only charged for one code, even if you check all three.

6. Click on Submit to create the CDC.
